

Gain the competitive edge with a Traineeship

Case study

Stephanie

Traineeships prepare

Stephanie came from an unsettled background living in a foster home.

Stephanie attended an S&B Open Day and was inspired by the possibility of becoming an automotive apprentice. Stephanie was enrolled as a trainee as a stepping stone to her goal to becoming a mechanic.

As a trainee Stephanie was able to engage in all automotive repair tasks and MOT's at her host placement.

Stephanie has successfully completed her Traineeship and is now employed as a Light Vehicle technician apprentice with Bond Motor Services Ltd.

I think the programme is really well thought out. It has helped me every step of the way. Trainee Stephanie Knight

I am very impressed with Stephanie's attitude and the way she settled into her role. She has a massive willing to learn attitude and is always asking questions about vehicles. I really hope her career here is for the future and wish her a the success in the world.
